

Lake Dunstan

Otago Region

Regulations
Angling regulations are reviewed annually, please check your regulation guide booklet before fishing any water.

DANGER: NAVIGATION HAZARD

Shallow water and sand bars in the Kawarau Arm. Navigate with caution.

KAWARAU ARM

Speed Limit: 5 knots within 50 metres of any other vessel or swimmer, otherwise no speed limit.

BOATIES PLEASE NOTE

On exiting the lake please inspect your boat and trailer thoroughly for the noxious plant *Lagarosiphon major*

GENERAL ANGLING HINTS

- The importance of Polaroid sunglasses can not be over stated. They improve an anglers ability to distinguish weedbeds, identify fish and protect eyes from harmful UV and flying fish hooks.
- Re-tie knots frequently, especially after landing a good fish.
- No hook is too sharp. Use a small file or similar to maintain sharp points.
- There is no such thing as a magic lure. Try different sizes and colours. Use a lure that you feel confident with.
- If hook ups are slow, try something different.
- Seek advice from local sports stores for current information.

ALL WATER USERS PLEASE NOTE:

Didymosphenia geminata is in the Clutha system.

Please ensure all boating and fishing equipment, clothing etc which comes into contact with Lake Dunstan and/or the waters of the Clutha catchment is decontaminated before visiting another waterway. Use the methods described here by **Biosecurity New Zealand.**

CHECK CLEAN DRY

CHECK

Remove all obvious unwanted material from items that have been in contact with the water.

CLEAN

Clean all equipment with a detergent solution ensuring surface contact for one minute. You can use a five percent solution of dishwashing liquid that you can buy from a supermarket.

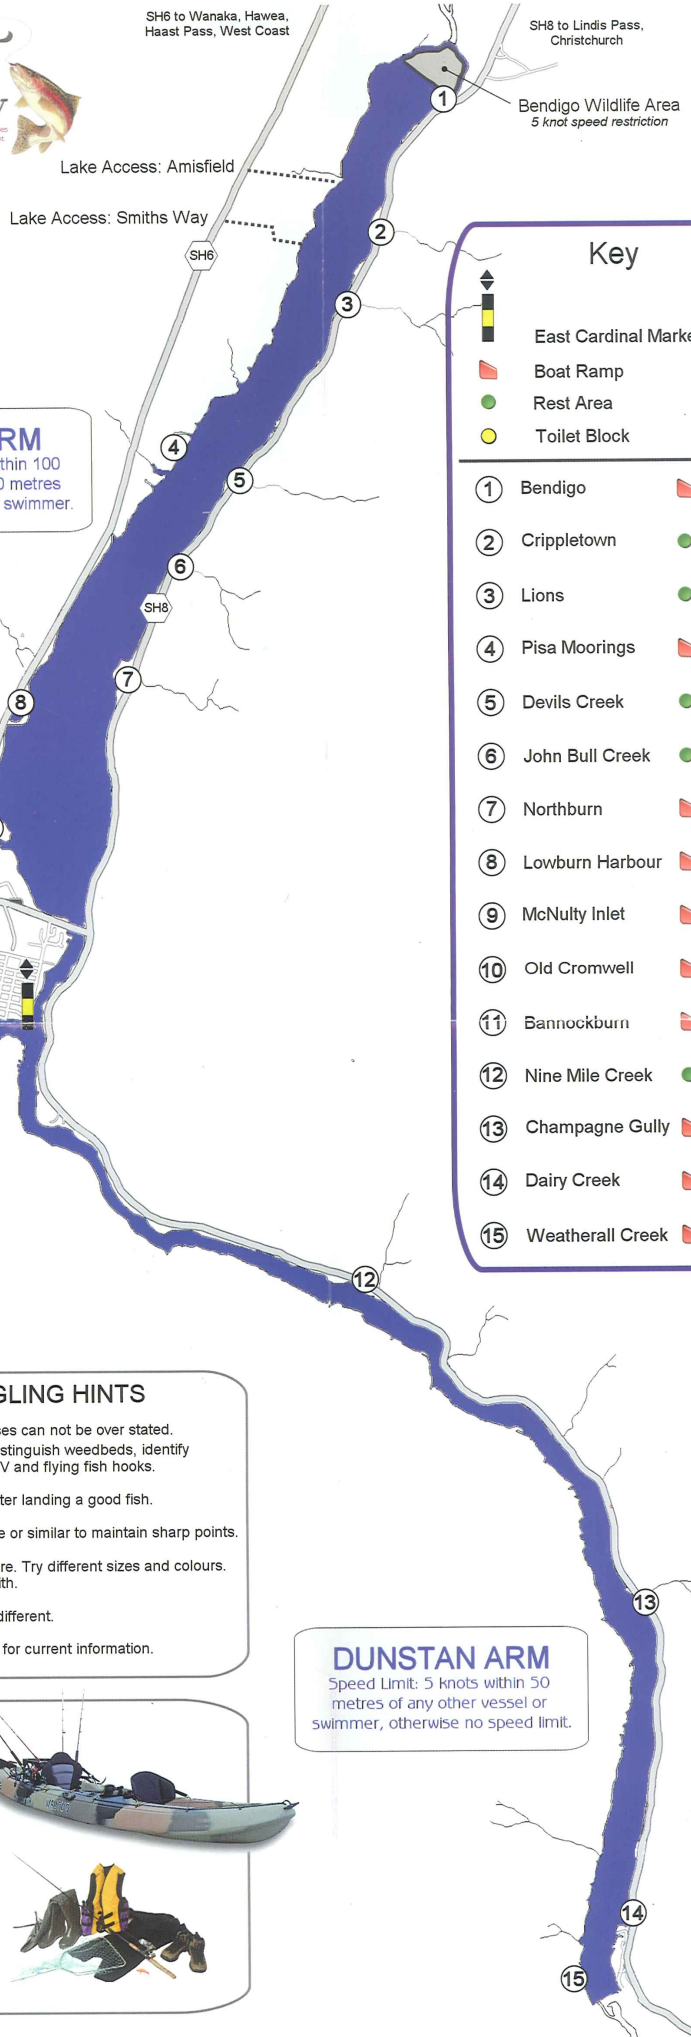

DRY

Drying the item to touch and leaving for at least 48 hours will kill Didymo.

DUNSTAN ARM

Speed Limit: 5 knots within 50 metres of any other vessel or swimmer, otherwise no speed limit.

SH8 to Alexandra, Dunedin
